

I am writing in regards to the Low Power FM situation that is being considered. Please know that in our household we listen to and support K-LOVE radio which is transmitted via a translator here in the El Paso, TX area and it would be a great loss to this community if we were to lose the ability to hear K-LOVE here as it is not a local radio station and there is no other station that plays the similiar music as K-LOVE does. So please consider all these things as you decide what is best for all concerned in all areas affected by these LPFM stations, not only the one mentioned above. Thank You for allowing us to voice our opinions on this matter.
